DATES

OF

UNITED STATES COINS,

AND THEIR

DEGREES OF RARITY.

The following table has been prepared after a long experience in the collection of this particular class of Coins, and will save trouble in searching for dates which are really not to be found.

In those few instances in which it does not agree with the Mint records of coinage, the disagreement may be explained by what is said to be the fact, that in former years there was not that precision that there is at present in the disuse of the dies at the expiration of the year of their date; and sometimes Coin made late in December, would not be delivered over to the Treasurer till January following, and would then appear in his report for the new year.

The copper Cents and Halves, for the year 1857, were all coined in the month of January; after that date the coinage of them was discontinued.

By the Act of Congress, passed February 21, 1857, the coinage of the Nickel Cents was authorized; and the first delivery at the Mint for circulation, was made on the 23d of May of the same year.

On the last page is a list of Experimental or Pattern Pieces, with their respective dates, which were coined at the Mint since its establishment.

JOS. J. MICKLEY.

Philadelphia, July, 1858.

Explanation of the Letters used in the Table.

C. signifies Common.
R. " Rare.
V. R. signifies Very Rare.

A very important sale, particularly rich in quality large cents. Unfortunately, Elder saw fit to retouch many of the illustrations, removing or obscuring defects, etc. 275.00*
